40 - 150 hp, three-phase 380 - 575 Volts 60 and 50 Hz

Application Data:

Some pumping applications require more – and Franklin's Hi-Temp Motor line delivers just that – more. The Hi-Temp motor was designed and built in response to many requests for a motor that can operate dependably in wells with high temperatures and/or low flow conditions.

The Hi-Temp 75C 8" motor utilizes a new, premium encapsulation process and new water soluble coolant to allow continuous operation in water temperatures of up to 75 °C (provided minimum allowable rates of flow past the motor are maintained). In addition, this design is capable of handling thrust loads 25% higher than a standard motor without using oil.

Franklin's Hi-Temp 75C is the right choice for your demanding, high temperature well applications.

Basic Features:

- Up to 167 °F (75 °C) ambient temperature
- 25% increase in upthrust capability at 30 °C
- 25% increase in downthrust capability at 30 °C
- Wet Well, Reservoir, Low Flow approved in 14" diameter or larger wells with ambient water up to 87 °F (30 °C)
- High temperature leads
- Hermetically sealed stator
- Innovative high temperature winding encapsulation system
- FE water soluble, high temperature bearing lubrication
- Double-flange NEMA mounting for ease of handling and pump mounting
